Master of Computer Applications (AI & ML) | Microsoft Certified: Azure AI Fundamentals (AI-900)

Cover Letter: AI / ML Engineer — Purchasing AI Hub (Req 34788)

Volvo Group | Bangalore, India | September 1, 2026

Dear Volvo Group Hiring Team,

I am writing to express my strong interest in the AI / ML Engineer position within Volvo Group's Purchasing AI Hub (Requisition ID: 34788) in Bangalore.

As an Applied AI & Machine Learning Engineer currently architecting enterprise agentic platforms and ERP AI systems serving 1M+ active users across 120+ organizations, my background directly aligns with your mandate to turn high-value purchasing opportunities into scalable, secure, and production-ready AI solutions. Combining hands-on experience in Spring AI Model Context Protocol (MCP) server development, LangGraph orchestration, hierarchical RAG architectures, and Azure OpenAI, I specialize in bridging complex enterprise data with low-latency LLM workflows.

- **Enterprise Agentic Orchestration & MCP**, Engineered Spring AI Model Context Protocol (MCP) tool servers for real-time transactional ERP data extraction, and designed a single ReAct loop capability contract layer that reduced multi-agent orchestration overhead by 3x and token consumption by 70%.
- **Hierarchical RAG & Knowledge Retrieval**, Implemented a hierarchical RAG pipeline indexing 10,000+ technical documents using GROBID, pdfplumber, and PostgreSQL/PGVector, achieving a 90%+ Recall@10 retrieval rate.
- **LLMOps, Evaluation & Alignment**, Developed the Prompt Lab evaluation control plane to systematically log multi-turn reasoning trajectories, tool call payloads, and human preference annotations, establishing a scalable Human Feedback (RLHF) Pipeline and LLM-as-judge benchmarks.
- **Secure AI & Enterprise Governance**, Fortified agentic workflows against OWASP LLM vulnerabilities using phantom-token context propagation, runtime tool monitoring, and trained token-classification models for automated PII redaction.

Volvo's vision to transform strategic sourcing, supplier intelligence, and spend management requires production-grade systems capable of reasoning across heterogeneous contracts, supplier networks, and ERP transactions. Having built and optimized mission-critical agentic systems at 1M+ user scale, I am eager to apply my expertise in MCP server development, vector retrieval, and responsible AI governance to accelerate the technical deliverables of Volvo's Purchasing AI Hub.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my technical leadership and hands-on engineering background can contribute to shaping sustainable and intelligent transport solutions at Volvo Group.

Sincerely,
Yash Rawal
